(54) Title: METHOD AND APPARATUS FOR MOLECULAR ANALYSIS IN SMALL SAMPLE VOLUMES

(57) Abstract: The interrogation of extremely small
sample volumes can be accomplished with the present
invention. Provided are probes having disposed thereon
a plurality of domains forming an array, which is
suitably a nanoarray. Also provided are methods of
detecting molecules and molecular interaction events,
retrieving and analyzing analytes, and delivering
substances to cells or tissues using probes of the
invention.
